PROFESSIONAL SUMMARY

Motivated and detail-oriented Software Engineer with hands-on experience in Java, Spring Boot, SQL, ReactJS, NodeJS, and MongoDB. Skilled in backend API development, frontend enhancements, database operations, and real-time application support. Experienced in shipment tracking, delivery visibility, push notification services, and deployment workflows. Strong understanding of REST APIs, debugging, Agile methodologies, SDLC processes, and web application development.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Web Technologies: HTML, CSS

Frameworks & Technologies: Spring Boot, ReactJS, NodeJS

Backend: REST APIs, JPA, Hibernate

Databases: MySQL, MongoDB

Tools: Git, Postman, Swagger

Concepts: Agile Methodology, SDLC, Debugging

PROFESSIONAL EXPERIENCE

Software Engineer Trainee | Imaginnovate Tech Solutions | Sep 2024 – May 2025

- Developed backend applications using Java, Spring Boot, SQL, and basic Kafka concepts.
- Built REST APIs and implemented CRUD operations for enterprise applications.
- Designed and managed entity relationships using JPA and Hibernate with MySQL.
- Tested APIs using Postman and documented endpoints using Swagger.
- Participated in debugging, issue resolution, and feature enhancements.
- Contributed to the development of an E-Commerce Backend Application.

Technologies: Java, Spring Boot, SQL, MySQL, JPA, Hibernate, REST APIs

Software Engineer | J.B. Hunt Visibility Mobile Services Application | Jun 2025 – Sep 2025

- Worked on a real-time client application supporting shipment and delivery visibility.
- Implemented frontend enhancements for tracking, pickup, order, and delivery status updates.
- Developed a Push Notification Service using Java and Spring Boot.
- Enabled users to receive shipment and order-related notifications.
- Performed deployment validation and testing in development and production environments.
- Collaborated in Agile sprint-based development with onsite and offshore teams.

Full Stack Developer | AAPS Placements Training and Consulting Services | Dec 2025 - Present

- Developed a responsive business website using ReactJS, NodeJS, and MongoDB.
- Built frontend pages and integrated backend APIs.
- Implemented CRUD operations and database connectivity using MongoDB.
- Performed application enhancements, debugging, and ongoing website updates.

PROJECTS

Driver Drowsiness Detection System | Jan 2023 – Apr 2023

- Developed a real-time driver drowsiness detection system using Python and OpenCV.
- Implemented eye and facial movement detection to identify driver drowsiness conditions.
- Used image processing and basic machine learning techniques for monitoring.

- Integrated OpenCV, dlib, and SciPy for face and eye detection.

Technologies: Python, OpenCV, dlib, SciPy, Machine Learning

E-Commerce Backend Application

- Developed backend APIs for product, category, cart, and order management using Spring Boot.
- Implemented CRUD operations and entity relationships using JPA and Hibernate.
- Managed MySQL database operations and API testing using Postman.
- Documented REST APIs using Swagger and performed backend debugging.

Technologies: Java, Spring Boot, REST APIs, JPA, Hibernate, MySQL, Postman

EDUCATION

Bachelor of Technology (B.Tech) in Electronics & Communication Engineering

Rajiv Gandhi University of Knowledge Technologies (RGUKT-SKLM)

2019 – 2023 | CGPA: 8.3

CERTIFICATIONS

- Java, Spring Boot & SQL Training Certification – Imaginnovate Tech Solutions
